Thus, you can submit your website to all major search engines and start improving your listing with them. Moreover, you can control the frequency of Google Scans and detect how many websites link to your page. notched out in the upper surface of the pane, and have eight ribs on the inner surface, three ribs on the outer surface, and five ribs on the interior face of the notch. In my application, I like to apply a light spatter of silicone paint to the exterior of the casing to give it a distressed, weathered look. Cut the casing with the window pane as shown on page 20. Glue the window to the outside of the casing with contact cement. Using a 3/4" wood sill molding, cut a piece to fit the inner edge of the window. Trim the molding so it will fit just inside
