Aes 2.24 torrent fsx with creditsQ: How to remove the delay when pressing a button in an GUI in Java? I have a problem that I have spent the past hour reading about, but I cannot find an explanation that makes sense to me. Maybe I've been looking at this too long, but I've tried debugging for too long. I think that I understand how to use javax.swing.Timer, but it has been so long since I used Java. I'm not sure if this is the correct way to go about it, but here is what I have so far:

```
import java.awt.AWTException; import java.awt.event.ActionEvent; import java.awt.event.ActionListener; public class GUI { private JFrame frame = new JFrame("GUI"); private JButton button = new JButton("Click Me"); private Timer tm; private ActionListener aListener = new ActionListener() { public void actionPerformed(ActionEvent ae) { //Do Nothing } }; public GUI() { frame.setSize(200, 200); frame.setVisible(true); add(button); button.addActionListener(aListener); tm = new Timer(2000, aListener); tm.setRepeats(false); tm.start(); } public static void main(String[] args) { new GUI().frame();
```
